

# NETiDENT

## Reporting

NETiDENT enhances network performance management with robust reporting capabilities, providing detailed insights for effective analysis and troubleshooting

### Real-Time and Near Real-Time Reporting

- **Modern User Interface:** Enjoy a sleek and contemporary dashboard design that enhances usability and visual appeal.
- **Customizable Layouts:** Tailor the display to show the data that matters most to you, with easy-to-use customization options.
- **Drill-Down Capabilities:** Navigate seamlessly from high-level overviews to detailed dashboards, allowing for in-depth analysis.

### Customizable Report Templates

- **User-Selectable Report Formats:** Choose from a variety of report templates provided by the system, allowing for flexibility in data presentation.
- **Multiple Output Formats:** Export reports in various formats, including HTML, PDF and CSV, to meet different documentation and analysis needs.

### Device and Asset Inventory Reports

- **Detailed Inventory Listings:** Generate comprehensive reports detailing all devices and assets within the network.
- **Asset Management:** Keep track of inventory with detailed information, aiding in asset management and planning.

NETiDENT's powerful reporting tools ensure that you have the necessary data at your fingertips, enabling proactive network management and efficient problem-solving.
